

COLLEGE of INTERNATIONAL
ESTHETICS

Microdermabrasion Certification

This course includes theory and hands on training, giving students the confidence they need to perform safe and successful treatments. This course includes theory and hands on training, giving the professional the confidence they need to perform safe and successful treatments.

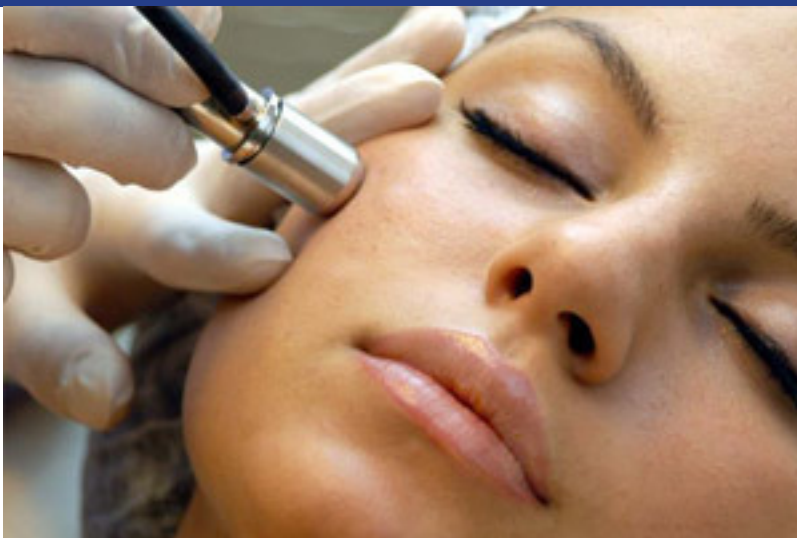

Students have the opportunity to learn different methods and to learn on machines from different manufacturers, including both crystal and crystal-free options.

Microdermabrasion is a non-chemical, non-invasive procedure that uses either a spray of microcrystals or a "diamond" encrusted wand to remove the outermost layer of dry, dead skin cells to reveal younger, healthier-looking skin.

In this course students will cover histology and physiology of the skin, skin conditions and contraindications, cleaning, disinfection, sterilization, safety and treatment procedures.

Colorado State Board Approved Certification: 14 hours

COST: \$475, Required Deposit of \$100 (includes \$50 admin fee that is non-refundable)
